SKILLS

Frontend
React, Next.js, TypeScript, JavaScript, Tailwind CSS, Storybook, design systems, accessibility (WCAG)

Backend
.NET, C#, ASP.NET, Node.js, SQL Server, PostgreSQL

Testing & delivery
Playwright, Vitest, axe, GitHub Actions, Octopus Deploy, Docker, AWS, Vercel, Cloudflare

AI
Agentic development with Claude Code: skills, hooks and shared project rules

LANGUAGES

Romanian
Native or bilingual

English
Full professional proficiency

German
Elementary proficiency

SUMMARY

> Full-stack engineer with a frontend accent, building for the web since 2019. I build features end to end with AI agents in Claude Code: the agent researches, plans, implements and tests, and I review each step. I care about the parts users never see, such as architecture, tests, accessibility and delivery pipelines, because they decide whether the parts they do see keep working.

WORK

Full Stack Engineer

Mar 2025 – Present · Visma, Sibiu (hybrid)

Payroll and HR software for Danish employers, in a team across Romania and Denmark.

New web platform (Next.js, TypeScript) · 2026

- Designed the feature-based architecture the modules sit on, with layer rules the linter enforces, so a large team can build in parallel.
- Set up and own the CI/CD pipeline with GitHub Actions and Octopus Deploy: unit tests with coverage, Lighthouse and Core Web Vitals budgets, bundle size and end-to-end tests. Features ship behind feature flags.
- Built 20+ accessible design-system components straight from Figma, documented in Storybook with automated accessibility checks; 13 of them in three weeks.
- Set up type-safe localization in English and Danish, synced with Crowdin, with a build check that fails on missing translations.

AI development (Claude Code)

- Wrote my own skills for repeatable workflows: task-flow, qa-walk (a browser walkthrough of every UI change) and pr-brief (a reading guide for large pull requests).
- Helped build the team's shared Claude Code setup: project rules, vendored skills and guard hooks every developer's agent follows.

Existing applications (.NET, React) · 2025 – 2026

- Migrated a legacy application to .NET 10 inside a new Next.js wrapper, with a modern UI and new features, keeping it familiar to its users.

Founder & Developer

Jan 2025 – Present · Bigdan Web (PFA), Sibiu

- Own studio: custom websites, online stores, custom software and audit reports for small businesses.
- Every client site starts from my own Next.js starter, with privacy, accessibility (WCAG 2.1 AA) and technical SEO in place on day one, and a load-time target under one second.
- Shipped client work such as the Futterfarm FFB online store; a typical site goes from first call to launch in three to six weeks.

Frontend Developer

Oct 2021 – Mar 2025 · IT Perspectives, Sibiu (hybrid)

- Developed product screens in clean code following the team's guidelines and patterns.
- Reviewed teammates' code to keep it consistent and catch errors early; refactored existing areas for reuse and quality.
- Worked with the Product Owner on better solutions and clearer requirements, and onboarded new teammates.

Trainee

Jul 2021 – Oct 2021 · IT Perspectives, Sibiu

PROJECT

Next template

Sep 2026 – Present · solo

- Production starter for small-business websites where architecture, privacy and security rules are enforced by lint and CI, not by memory.
- A throwaway Postgres branch per CI run, deploys from CI and a smoke suite against production; around 75 pull requests in six weeks, axe on every end-to-end run.

EDUCATION

Bachelor's degree, Informatics
2021 – 2024 · Lucian Blaga University of Sibiu

Web Designer, Front End Development
2019 – 2020 · Swiss Webschool Academy

High School Diploma, Mathematics and Computer Science
2017 – 2021 · National College "Onisifor Ghibu", Sibiu
